

NEW! AquaStitch™

Repairs and Stabilizes Concrete Cracks and Fractures in Swimming Pools, Walls and Decks!

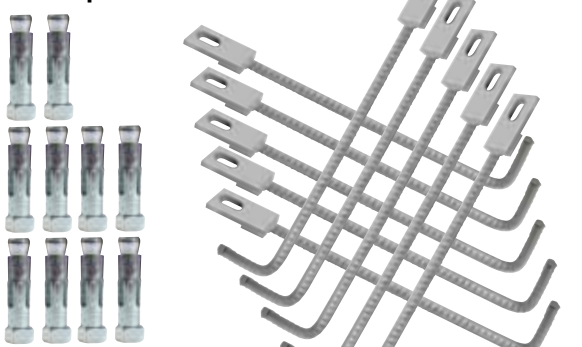

Not just simple staples... AquaStitch gives cracks in pool concrete a long-lasting fix that's both mechanically AND structurally sound! AquaStitch permanently stabilizes and repairs structural cracks and fractures in concrete, gunite and shotcrete swimming pools and pool decks. Use along with our CR-2100-250 high-strength, two-part anchoring epoxy.

- Repairs structural cracks in concrete, gunite and shotcrete swimming pools
- Engineered & designed by pros
- Best performing system available
- Simple installation - complete Instructions included
- Works on flat areas or outside curves
- Inhibits cracks from expanding further
- Stitches are hot-dip galvanized to prevent corrosion
- Guaranteed against manufacturer defects
- Available in kits or individually

Engineered For Field Use

Everything You Need To Repair a 5' or 10' Crack!

- Expanding anchor studs with nuts
- AquaStitch ASN-12 mechanical stitches
- 1 Cartridge of AquaBond CR-2100-250 Anchoring Epoxy
- 1 Mixer nozzle
- 12" Ruler
- 1 Installation, materials and instruction guide

10' Crack = ASKN-12-10 Kit
5' Crack = ASKN-12-5 Kit
Individual Stitch: ASN-12

NEW! Polyurethane Foam Crack Injection Kit for Leaking Swimming Pools

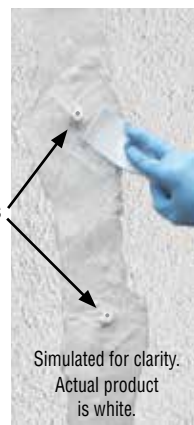

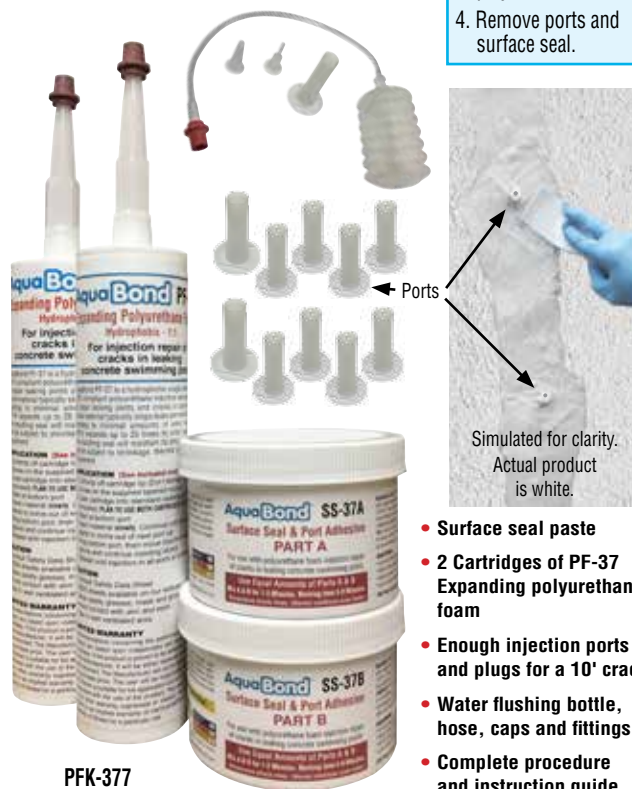

PFK-377

Everything You Need To Fill and Plug a Leaking 10 Foot Crack!

The Aquabond PF-377 Crack Injection System injects an expanding foam resin designed to repair leaking joints and cracks in concrete. **NOT JUST A SUPERFICIAL FILLER.** The polyurethane foam expands to 25 times its original volume and seeps into every crack and fissure - and plugs the entire thickness of the concrete. When cured, this permanent, waterproof resin maintains its physical form and elasticity, and is not subject to shrinkage, even through normal ground movement and thermal cycles.

The PFK-377 System is the perfect companion to our Aquastitch crack stabilization system. When you permanently fill the entire length, width and depth of the crack with PF-77, then stabilize it with our Aquastitch mechanical stitches, you have performed the ULTIMATE in crack repairs!

1. Stick injection ports to pool wall.
2. Cover crack with Surface Seal paste.
3. Inject expanding polyurethane foam.
4. Remove ports and surface seal.

Simulated for clarity. Actual product is white.

- Surface seal paste
- 2 Cartridges of PF-37 Expanding polyurethane foam
- Enough injection ports and plugs for a 10' crack
- Water flushing bottle, hose, caps and fittings
- Complete procedure and instruction guide

PFK-377

AB-1000 makes wet niche potting fast, clean and easy!

Save up to **70% on encapsulation costs!**

Anchor threaded rods, bolts and rebar dowels to concrete with our new CR-2100-250 Anchoring & Doweling Epoxy.

Your finished repairs are stronger than the surrounding concrete!

Self-Leveling, CR-2000 epoxy seeks its own level, nicely filling holes and cracks on horizontal surfaces

Non-Sag, CR-2100 epoxy stays put on vertical surfaces. Fill cracks and adhere things on walls.

Make repairs underwater WITHOUT draining the pool!

with **AquaFLEX** and UW-5000/UW-5200 underwater repair compound

THE AquaBond® SYSTEM

Wet, Dry or Underwater!

Professional Adhesives and Sealants for Pool, Spa and Water Feature Applications

AquaBondAdhesives.com

Starter Kits in 50ml and 400ml sizes

Get going fast with our complete starter kits, then buy additional adhesive cartridges and static mixers when needed.

Our handy "DMK" starter kits include a heavy duty dispensing gun, one cartridge of adhesive and a supply of no-mess static mixers.

50ml Starter Kits

50ml kits are available in any of our 50ml adhesive products including Non-sag and Self-leveling Concrete Repair, Underwater Repair, Structural Repair and AquaFlex Crystal Clear Underwater Sealants.

400ml Starter Kits

400ml kits are available in Concrete Repair (Self-leveling or Non-sag) and our AquaFlex Low Flow, crystal clear underwater sealant.

400ml cartridges contain 8 times more adhesive than the 50ml size!

Carry Cases, Fully Stocked!

Our Carry Cases can be pre-packed with any mix of our 50ml adhesives or sealant cartridges.

Cases include one DM-50 dispenser, 5 cartridges of adhesive and 20 SM-5416 static mixers.

SM-5416 Pack of 10 (50ml system)

SM-7524 Pack of 10 (for AquaFlex 400ml only)

SM-0824 Pack of 10 (400ml system)

Pool, Spa & Fountain

Wet Niche Potting Compound

Do it Right... Do it to Code!

with AquaBond's U.L. Listed Potting Compound!

Shown with AB-1000 50ml Cartridge, DM-50 gun and SM-5416 mixer tip in place.

- UL Listed
- Contains NO Deca-BDE
- Aqua-blue color
- Working time 8 minutes
- Preferred by electrical inspectors nationwide
- Required by NEC
- 100% compliant

LISTED 9MA7
