Choose
Clear or White

ABC-9100-300 Clear
ABW-9000-300 White

**Bonds aluminum, steel, glass, wood, masonry, ceramics,
plexiglass, fiberglass and vinyl**

- High viscosity - Maximum gap fill - Takes the place of silicone
- Apply in wet or dry areas - even under water
- Skins over in five minutes - Can be painted in 24 hours
- Fills and seals expansion joints, cracks, joints, seams
- Bonds dissimilar substrates and stays permanently flexible (and our clear stays clear!)
- Great transition material between concrete and stainless or vinyl
- UV stabilizers added for above water application
- Dispenses with standard caulking gun - for best results use our DM-250 high-thrust gun

**“Bond... AquaBond”
Get the job done professionally!**
